

STAIRWAY TO WELDING SCHOOL

**There's a premed who's sure
That counterclockwise is "R"
And his grades will make him perfect
For welding school**

**When he gets there he'll say
What was that rule of the day
Maybe I should have made a better
Road map**

**Ooooooooo He never wanted to study
Ooooooooo He thinks chemistry is cruddy**

**And his grades will make him perfect
For welding school**

**And as we waste our time away
In organic lab all day
How come my products look like clay
We should have been nicer to the T.A.**

**And our grades will make us perfect
For welding school**
