

## We All Love Organic Chemistry

**In the town where I was born,  
Lived a man of chemistry.  
And he told us of his life  
In the organic laboratory.**

**Making molecules to fight disease  
Coming up with their syntheses.  
So we sit in 310M  
Learning organic chemistry.**

*Refrain:*

*We all love organic chemistry  
Synthetic chemistry  
Molecules with "C"  
We all love organic chemistry  
Synthetic chemistry  
Molecules with "C"*

**All our friends think we're a bore  
Our grade point averages begin with 4.  
But we await graduation day  
To work in lab for meager pay.**

**But its OK, who else can say  
They're curing cancer or fighting AIDS.  
We hope that you in 310M  
Respect organic chemistry**

*Refrain:*

*We all love organic chemistry  
Synthetic chemistry  
Molecules with "C"  
We all love organic chemistry  
Synthetic chemistry  
Molecules with "C"*
